DETAILED ACTION

Allowable Subject Matter

Claims 6-8, 14-21, 27-29 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 6-8, with the important feature being the diffusion the diffusion layer is composed of a compound which changes light transmittance depending on irradiation of the energy beam(claim 6); a light shield layer and a light diffusion layer, the light shield layer containing light transmitting regions and light shielding regions and being positioned between the optical element and the light diffusion layer(claim 7); or the light shielding layer containing small balls having transmissivity(claim 8) . Therefore claims 6-8, 14-21, 27-29 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
